

Peak Demand Automation

The wireless campus

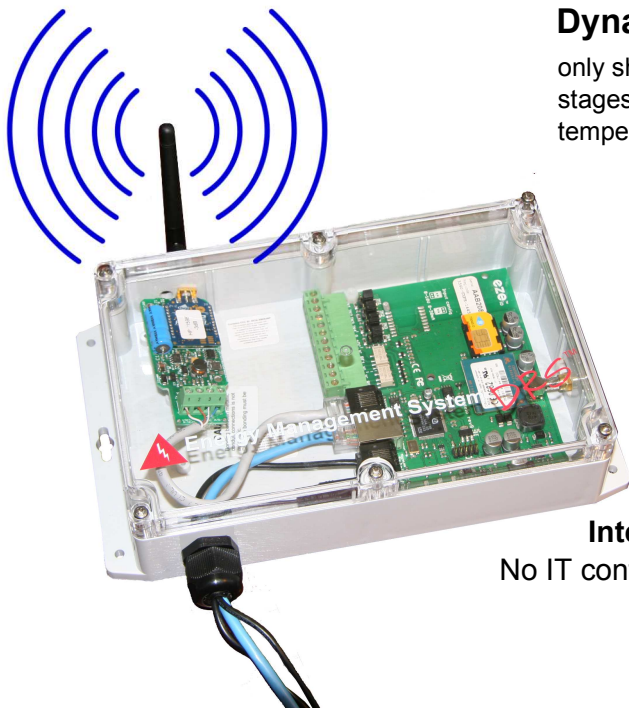

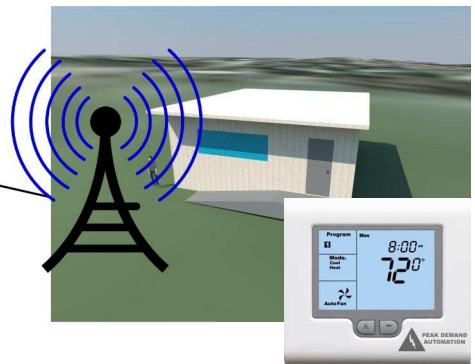

Classrooms with communicating thermostats

Wireless:

- low cost.
- easy to maintain.
- easy to move.

Saves Money
Improves Air Quality

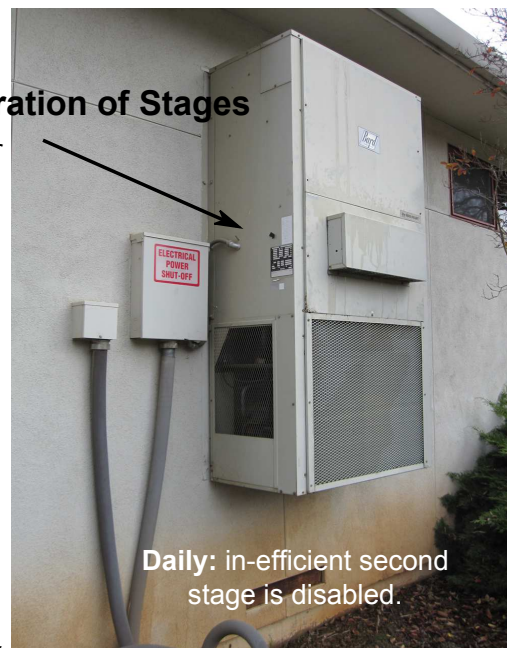

Base controller, temperature probe with base radio

DPS™

Dynamic Re-configuration of Stages

only shuts off inefficient upper stages if outside air temperature is warm enough.

Daily: in-efficient second stage is disabled.

Internet control
No IT configuration necessary

Improves Air Quality

flushes out CO₂

Three year stored schedule!
