

Peak Demand Automation

Zone/Motion Dimmer

Retrofit any fluorescent or LED zone into a money saving occupancy based dimming zone.

Dimming of both occupied and unoccupied areas saves the maximum amount of energy

- Occupancy sensing with standard motion detectors

Drives up to ten fixtures

Adjust dimming and maximum brightness levels, 0 - 90%

Selectable occupancy time: 5 - 40 minutes

Fluorescents: Universal power supply: 120 or 277 V

LED: wide voltage input (12-50VDC) works directly off LED CC or CV drivers.

Reduces power required in any area.

Works with virtually all 0-10 V dimmers
Fluorescent or LED.

Compatible with wall switch dimmers

Most LED fixtures do not require additional power supply

Ballast or LED driver not included
